

NextGen Introduces Line of High Value Display Mounts

LED Models Save Time and Money with Aggressive Pricing and Ease of Installation

Port Richey, Florida - August 1, 2011 - NextGen, an innovative provider of unique product solutions for the a/v markets, announced a new line of ultra-slim video display mounts that set a new benchmark of outstanding value for installers and consumers alike. The company's new display mounts offer quality construction, ease and security of installation and an ultra-slim profile, all at highly affordable price points making them a remarkable value.

Model # 1340 Mount for 32" to 55" displays

NextGen's four display mount models are: # 1320 (\$24.95 MSRP) with a max VESA 200 X 200 and suitable for screen sizes 17" to 37", # 1340 (\$27.95) with a max VESA of 400 X 400 for screen sizes 32" to 55", # 1342 (\$29.95) with a max VESA of 600 X 600 for screen sizes 42" to 60" and the # 1344 (\$31.95) with a max VESA of 800 X 800 for screen sizes 42" to 70". All kits come complete with everything you need for installing into a variety of surfaces.

According to NextGen's President, Bob Dolatowski, "Our new line of display mounts looks great, they're easy to install and best of all, are a terrific value. The mounts are of the highest quality and made to our specifications by an experienced manufacturer. The four sizes fit virtually any size home display and make installation as easy as hanging a picture."

Mr. Dolatowski went on to add, "With displays being slimmer and our display mounts placing them very close to the wall, the shallow space will make regular HDMI connections more difficult. This is a great application for NextGen's Twister (\$19.95 MSRP), the only 360° HDMI connector that allows for perfect HDMI connections in the most limited of spaces. Dealers should consider merchandising both the LED mounts and the Twisters together."

NextGen's Twister

NextGen LED display mounts are available to order now and along with the Twister, are available for immediate delivery.

Key Features of NextGen Display Mounts:

- Rugged, high quality construction with ultra-slim design
- As easy to install as hanging a picture
- Comes complete with everything you need in the box
- Models to fit virtually any size residential LCD, LED or Plasma display
- Exceptional value - priced lower than comparable mounts

NextGen will be exhibiting in Booth # 5730 at the upcoming CEDIA Expo September 8-10 at the Indiana Convention Center in Indianapolis, Indiana.
